

RESIDENTIAL

INTERIOR DESIGN

Create a home that truly reflects your personal style, enhances your daily life, and increases the value and appeal of your property. Whether you're refreshing a single room or reimagining your entire space, I provide services such as space planning, furniture selection, color palette guidance, and decor styling.

My focus is on designing a cohesive, welcoming environment that's thoughtfully tailored to your lifestyle and needs, ensuring your home is both beautiful and impactful.

STEP 1

Initial Consultation

The initial consultation is an essential step in the design process and typically lasts one to two hours. During this session, we'll explore your vision for the space, including your style preferences, functional needs, and overall budget. It's a chance to discuss the project scope, highlight specific elements you'd like to include, and address any questions or concerns. This meeting allows me to gain a deeper understanding of your goals and expectations, ensuring the design is thoughtfully tailored to reflect your unique needs and vision.

STEP 3

Spacing Planning

Detailed floor plans and elevations will be created to illustrate the precise placement of furniture and key elements in your space, ensuring the design is both functional and tailored to your needs. Your feedback is essential throughout this process, and together we'll refine the initial ideas to develop a final design plan that aligns perfectly with your vision and budget.

STEP 5

Installation

Once the design is finalized and all materials are selected, this is when everything comes together. I'll work closely with contractors and other professionals to ensure the space is completed according to plan. This includes overseeing construction, coordinating deliveries, and managing the placement of furniture, decor, and final touches. From hanging artwork to arranging accent pieces, every detail is installed with care and precision to bring the design to life seamlessly and beautifully.

STEP 2

Design Concept

After the consultation, I'll create a tailored design concept that captures the overall look and feel of your space. This will include mood boards, layout options, and a cohesive color palette, as well as the selection of materials and furnishings. I'll present these preliminary ideas to you, ensuring they align with your vision and meet your functional needs. Together, we'll refine the concept to create a design that is both beautifully styled and perfectly suited to your lifestyle.

STEP 4

Sourcing, Implementation, & Project Management

We'll collaborate to select the perfect materials and finishes, such as flooring, wall coverings, and lighting fixtures, to bring your design concept to life. I'll also handle sourcing furniture, decor, and other elements, ensuring every piece complements the overall vision. To make the process seamless, I provide project and product management services, working closely with contractors, builders, and vendors to coordinate every detail. From overseeing timelines to managing product delivery and installation, I'll ensure your vision is brought to life effortlessly and with precision.

STEP 6

Final Reveal!

The moment you've been waiting for—the big reveal! Once everything is in place, I'll guide you through your newly transformed space, ensuring every detail aligns with your vision. This is a time to celebrate the finished design and make any final adjustments to ensure it's absolutely perfect.
