

E-DESIGN

INTERIOR DESIGN

E-Design is the perfect solution for both residential and commercial projects, offering professional interior design expertise from anywhere. Through virtual consultations and custom design plans, I help you transform your space into one that reflects your style and meets your specific needs. With this service, you'll receive personalized digital design boards, detailed furniture layouts, and curated shopping lists tailored to your space and budget. Whether you're redesigning a single room or tackling an entire property, E-Design provides you with the flexibility to implement a professional, cohesive look at your own pace.

STEP 1

Virtual Consultation

The process begins with a virtual consultation where we discuss your vision, style preferences, functional requirements, and budget. This conversation helps me understand your goals and ensures the design is customized to your needs.

STEP 2

Concept Development

I'll develop an initial concept that captures the overall look and feel of your space through custom mood boards and design inspiration. This step sets the foundation for your personalized design plan.

STEP 3

Space Planning

You'll receive a detailed floor plan that optimizes the layout of your space. This plan ensures the design is functional, practical, and makes the best use of the area.

STEP 4

Design Boards & Product Recommendations

I'll provide comprehensive design boards featuring recommended furniture, finishes, and decor, along with a curated shopping list. Every recommendation is tailored to your style and budget to create a cohesive design.

STEP 5

Implementation

With the final design plan and resources in hand, you can begin bringing the vision to life. E-Design allows you to implement the plan on your own schedule, giving you control while still achieving a professional-quality design.

CLIENT RESPONSIBILITIES

As an E-Design client, you'll take an active role in the process to bring your vision to life.

Responsibilities include:

- Managing all relationships with architects, builders, and contractors, including timelines, approvals, and on-site coordination.
- Measuring and documenting the space accurately, as all design plans are created based on the information you provide.
- Receiving and inspecting all furniture, lighting, and decor items.
- Installing and arranging furniture, lighting, rugs, and accessories according to the finalized design plan.
